707-708 PRUNER

1. Disassemble Pruner by removing Nut & Bolt. Pull Blade half clear and rid holder of old spring by holding upside down to allow it to drop out.
2. - Position Holder half upright as shown, insert bent end of spring into Grip opening as shown and allow spring to drop into position, shake slightly if spring does not seat immediately.
3. - Insert blade half, align holes and install Bolt. Tighten nut and back off until blade moves freely.
