

*Make child's play
of hedge trimming—*

**WISS
HEDGE SHEARS**
cut easily . . .

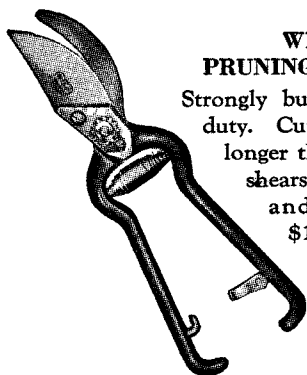

OPERATING on a new principle, Wiss hedge shears cut faster, easier and with greater comfort . . .

The lower blade has a serrated, saw-tooth edge that grips twigs and branches, and holds them fast, while the knife-edged upper blade cuts them off clean. There is no tendency to push branches forward in bunches, and no jerking "chop" "chop." The action is smooth and even—the blades cut clean and that means you can do more work, in less time, and with less fatigue.

When you take these shears in your hands you'll notice their perfect balance. They don't feel heavy. Most of the weight lies close to your body, not out in the blades.

Other features are unbreakable forged steel handles, comfortable wood grips, a sturdy over-size bolt, and perfect smooth-running adjustment. They are made by WISS of Newark, N. J.—the world's largest manufacturers of fine scissors and shears.

On sale wherever garden cutlery is sold, \$2.75 to \$4.00.

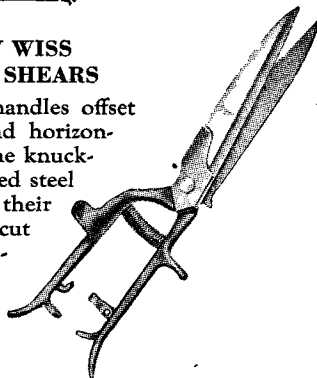

**WISS
PRUNING SHEARS**

Strongly built for heavy duty. Cut easier, last longer than ordinary shears. Nine sizes and patterns.
\$1.50 to \$4.25

**NEW WISS
GRASS SHEARS**

Improved handles offset vertically and horizontally, save the knuckles. Tempered steel blades hold their edge and cut like fine scissors. \$1.50
